Research Projects

- **Time Series Analysis of Climatic and Terrain Data retrieved from TerraClimate Dataset [A case study on Ranchi and Khunti District of Jharkhand, India]**
  (Guide: Dr. Nilanchal Patel, Professor, BIT Mesra)

  Time Series and Trend Analytics of Soil Moisture, Precipitation, Evapotranspiration, Highest and Lowest Temperature over a monthly temporal resolution data from Terraclimate.

- **Development of a UAV/Drone for Building Scanning**
  (Guide: Ar. Sangeeth S Pillai, Asst. Prof, MNIT Jaipur)

  Design and Development of a Low-cost Drone Controller using Raspberry Pi Pico.

- **PySteel: A Python Library for Steel Section Designing**
  (Guide : Prof. Somnath Majumder, Assistant Professor, TICT, Kolkata, Sept,2017-May,2018)

  Designing and Development of a complete Python Package for Designing Plate Girder and Gantry Girder economical and efficient section as per IS800-2007 Code Provision.

Eagle Tools for Infrastructure Accessibility Analysis
(Guide : Dr. Pooja Nigam, Assistant Professor, MNIT, Jaipur, July-August,2017)

The project targets the creation of Infrastructure Accessibility Maps using Urban Street Network Maps and places information from OpenStreetMap and Google Places API, and components written for Grasshopper 3D for McNell Inc. Rhinoceros 3D .

- **Stock Market Prediction System using Hadoop**
(Guide : Prof. Nizamuddin Laskar, Assistant Professor, TICT, Kolkata, Sept-Nov,2016)

To develop a system for real-time collection of Stock Market Data using Selenium web scrapping and using Hadoop and TensorFlow to Predict future prices
